## Explanatory Notes

**Please read these notes and the glossary and use the indices and general Orders provided in Book 2.**

### PURPOSE

This addendum summarizes all non-federal water rights adjudicated in this case. Its purpose is to make the final status of each right readily available. **Any variation in legal descriptions, XY coordinates and RG and map numbers from the subfile documentation in the Court record are intentional clerical corrections. Where substantive elements of the water right vary from the subfile documentation in the Court record, the information in the Court record controls, unless the changes are clearly noted as intentional.**

### CONTENT AND ORGANIZATION

**Section 1: Ditch Diversion Information** This section is organized alphabetically by ditch name, and contains information specific to each ditch such as point of diversion, source of water, total acres irrigated under the ditch, etc. **Bold type at the beginning of a line indicates a new ditch description. This section does not contain information on individual irrigation rights.**

**Section 2: Individual Irrigation Rights - Ditch** This section contains information on all individual irrigation rights for which a ditch is one of the points of diversion. This section is organized by ditch name and then by subfile number.

**Section 3: Individual Irrigation Rights - No Ditch** This section contains information on all individual irrigation rights for which a ditch is *not* one of the points of diversion. This section is organized by subfile number.

**Sections 4: Domestic Rights** This section contains information on all domestic rights. The Order filed December 1, 1988 excludes certain minimal groundwater rights from priority administration. Few of these rights are included in this adjudication. This section is organized by subfile number.

## Explanatory Notes (cont.)

**Section 5: Miscellaneous Rights** This section contains information on other water rights including commercial uses, community domestic water systems, etc. This section is organized by subfile number.

**Section 6: Impoundment Rights** This section contains information on all rights to impound water for various uses (e.g., storage in reservoirs for irrigation, stock ponds). The Order filed December 1, 1988 excludes certain minimal groundwater rights from priority administration. Few of these rights are included in this adjudication. This section is organized by subfile number.

### IDENTIFYING THE INFORMATION FOR A SINGLE WATER RIGHT

Sections 2 through 6 list all the individual water rights. Bold type at the beginning of a line indicates a new water right description. This first line of data for a water right contains *most* of the substantive elements of the right (e.g., acreage, farm delivery requirement). Information about the right which fails to fit neatly on the first line appears directly below in subparagraphs. When necessary, point of diversion information is contained in a box below the subparagraphs. Please Note: Any location information contained in the Point Of Diversion Box refers to the location of the point of diversion. All place of use information is found in the first line of data or in the subparagraphs that follow. For section 4 domestic rights, in all but two subfiles, the point of diversion location and place of use are the same.

In Sections 2 through 6, all point of diversion information appears in the Point Of Diversion Box. In Section 1, point of diversion information (i.e., ditch name) appears on the first line.

In Sections 2 and 6, priority is contained on the first line of data for each water right along with the other substantive elements of the right. In the other sections, priority appears in the Point Of Diversion Box.

Explanatory Notes (cont.)

INDICES AND GENERAL ORDERS (Book 2)

Book 2 contains five indices and copies of general Orders which affect substantive elements of individual water rights. The Owner Index and the Subfile Index contain the latest ownership established by the Court for all individual water rights adjudicated. These indices serve to connect owner names with specific water rights listed in the addendum. Book 2 also contains a RG number index, a Subfile Documents Index and a List of General Orders which directly affect individual rights. The general Orders contained in Book 2 may be helpful to review because in many cases these Orders were filed after individual subfile orders were entered. These Orders changed substantive elements of certain water rights. The addendum reflects the final status of each right. The Subfile Documents Index, the List of General Orders, and the Orders provided should be consulted if questions arise regarding the final status of a particular right.

Please note: Ditch Orders filed in the late 1970s and the early 1980s are out-of-date with regard to ownership and acreage. Therefore, copies of these Orders were excluded from Book 2.

## Glossary of Terms

- Area**            Surface area of an impoundment expressed in acres.
- Acres**            Number of irrigated acres.
- cfs**                Flow rate expressed in cubic feet per second.
- Cond.**            Numeric code for special condition which applies to the water right. As follows;
- 1        The subfile Orders state: Amount of Water: Not to exceed 2.2 acre-feet per acre per annum, except that defendant may divert up to 3.0 acre-feet per acre per annum in any year, provided that the total diversion in any 10 year period shall not exceed twenty-two (22.0) acre-feet per acre.
  - 2        The Order filed November 10, 1975 (Docket No. 414) adopts the November 10, 1975 Stipulation (Docket No. 414) between the OSE and the Llano Ditch Association. The Stipulation institutes ten-year averaging for all irrigation rights, and the delivery of an unspecified quantity of water to ditch association members for domestic and household use in addition to the agricultural deliveries.
  - 3        The Order filed December <sup>21<sup>st</sup></sup> ~~12~~, 1978 (Docket No. 724) states: Amount of water from ground water: 3.0 acre-feet per water right acre may be diverted in any given year, provided the total amount of water diverted does not exceed twenty (20) acre-feet per water right acre during any ten year period beginning January 1, 1979.
  - 4        The subfile Orders state: Amount of water from surface water: Not to exceed 2.2 acre-feet per acre per annum delivered at the farm headgate, except that defendant may divert up to 3.0 acre-feet per acre per annum in any year, provided that the total diversion in any 10 year period shall not exceed twenty-two (22.0) acre-feet per acre. Amount of water from ground water: 3.0 acre-feet per water right acre may be diverted in any given year, provided the total amount of water diverted does not exceed twenty (20) acre-feet per water right acre during any ten year period beginning on January 1, 1979.

Glossary of Terms (cont.)

Cond. (cont.) Numeric code for special condition which applies to the water right. As follows;

- 5 The Order filed November 15, 1977 (Docket No. 656) adopts the November 15, 1977 Stipulation (Docket No. 656). The Stipulation states: Amount of Water: May divert up to 3 acre-feet per acre per annum so long as total diversion in any discrete 10 year period, beginning on January 1, 1978 shall not exceed 20 acre-feet per acre.

CU Maximum consumptive use expressed in acre-feet per year for non-irrigation uses.

Depth Depth of an impoundment expressed in feet.

Div. Amt Maximum diversion amount expressed in acre-feet per year for non-irrigation uses.

FDR Maximum Farm Delivery Requirement (also referred to as headgate delivery amount or duty of water) expressed in acre-feet per acre per year for irrigation uses.

Map-Tract Hydrographic Survey map and tract numbers.

OSE File No. NM Office of the State Engineer's surface or groundwater file number.

POD Point of diversion

POU Place of Use

Priority Date of first appropriation or date of application for State Engineer permit.

Right Denied No right to diversion or use of water (i.e., No water right.)

Subfile No. Number assigned to track the adjudication of rights in the Court's docket and the OSE database.

Glossary of Terms (cont.)

T. R. Sec. Subsec Township, Range, Section and Subsection. 'SC' following subsection means the description is projected into the Sangre de Cristo Grant.

Total Irrigated Acreage/Total Surface Acres

Total number of irrigated acres, or total surface area of impoundments, served by a particular ditch.

Ditch AKA: Llano Ditch or Llano Corporation Ditch

Source of Water: Cabresto Creek, a tributary of Red River.

Location of Diversion: NE¼ SE¼ SE¼ Sec. 21, T. 29N, R. 13E, X= 705000 Y= 2085850

Comments: The Order filed November 10, 1975 (Docket No. 414) adopted the November 10, 1975 Stipulation (Docket No. 414) between the OSE and the Ditch Association. The Stipulation instituted ten-year averaging for all irrigation rights, and the delivery of an unspecified quantity of water to ditch association members for domestic and household use (see Subfile Z-14) in addition to the agricultural deliveries.

**Amount of Water:** A total diversion of 9.00 acre-feet per annum is hereby adjudicated to the El Rito de la Lama Ditch Association to be held in trust for inside-the-house domestic use and is allocated between households as administered by the ditch.

Further, a total diversion of 9.0 acre-feet per annum is hereby adjudicated to El Rito de la Lama Ditch Association to be held in trust for inside the house domestic use for the present owners of the originally licensed and intact domestic rights, as follows:

1. Pete A. Mertain - 3.0 acre-feet per annum;
2. Charles J. Mertain - 3.0 acre-feet per annum;
3. Dr. John Wilson - 3.0 acre-feet per annum.

**Points of Diversion:**

**Amount of Water:** Priority is 1940-11-14 for 13 cfs and 1941-01-09 for 3 cfs.

**Rate and/or quantity of diversion:**

The total diversion at any one time shall not exceed 16 cfs, except that diversion from the Red River diversion shall not exceed 6 cfs, at any one time.

All of the water diverted from all the points of diversion shall be returned to the Red River, except for the following quantities:

That amount lost by surface evaporation off the exposed total surface area of the rearing tanks, fish ponds and other exposed water ponding areas, which shall not exceed a total of 44.0 acres on surface area.

Of the 16 cfs adjudicated to the New State Game Commission, for the Red River Hatchery, 3.0 acre feet per year may be used for domestic purposes.

**POU Comments:** Location of ponds: X=675,380 Y=2,068,680 Central Zone.

**Additional Information:** Surface Water Diversions: Any diversion, at any time, from any one of the initial diversion points (Units 1, 2 and 3. Permit No. 1432) or alternate points of diversion shall not exceed 15 cfs, at any one time, except that in no event shall a diversion in excess of 10 cfs be diverted from Unit No. 3, at any one time.

Underground Diversions: RG-12797 and RG-12797-X are alternate points of diversion for the 15 cfs authorized under permit No. 1432.

Point of Diversion (License No. 1919): When used as an alternate point of diversion under permit No. 1432 all diversion, from this location exceeding 0.5677 cfs authorized under license No. 1919 (For 0.5677 cfs right see Subfile A-23.) shall have a priority of November 19, 1920, for 15 cfs from surface water sources as authorized under permit No. 1432, the use of water limited to milling purposes and transportation of waste product to tailings ponds.

Use: Limited to milling purposes and for transportation of waste product to tailing ponds to be located in Sec. 25, 35 and 36, T.29N., R.12E., N.M.P.M., from which water shall be returned to the mill or to the stream system. The combined wetted areas of the tailing ponds shall not exceed 49.0 surface acres at any time.

Amount of Water: Priority is November 2, 1961 for 40.25 acre-feet per year; June 27, 1966 for 201.25 acre-feet per year; July 11, 1966 for 273.60 acre-feet per year; and July 26, 1966 for 82.85 acre-feet per year.

Of the 933.6 acre-feet per year, 597.95 acre-feet per year has been perfected and vested, and 335.65 acre-feet per year are subject to proof of beneficial use under the Court's 1976 Order in Subfile Z-9. The Court adopts the stipulation of the State of New Mexico and the Town of Red River, attached to the Order filed December 15, 1999 (2733) as Exhibit A.

Purpose: Includes but is not limited to domestic, commercial, industrial, and recreational uses.
