26	5466	Author U.S. DEPARTMENT OF THE INTERIOR BUREAU OF INDIAN AFFAIRS Title NAVAJO PROJECT NEW MEXICO FEASIBILITY REPORT APPENDIX D AGRICULTURAL ECONOMICS FINANCIAL ANALYSIS Subtitle The construction of the Navajo Dam and Reservoir will regulate and store the waters of the San Jan River for the irrigation of a total of 137,250 irrigable acres of land, of which 28,250 acres are within the boundaries of the nonreservation-South San Juan diversion area; 109,000 acres are within the boundaries of the reservation—Shiprock diversion area, and supply 23,000 acre feet of supplemental water to presently irrigated lands below the land. The project area lands are about 200 feet above, and south of the entrenched San Juan River, extending from Bloomfield, New Mexico to within approximately 5 miles of the New Mexico-Arizona line, a distance of approximately 45 miles. Edition Publisher U.S. Department of the Interior Bureau of Indian Affairs: Window Rock, AZ January 1955	
26	5470	Author DEPARTMENT OF AGRICULTURE SOIL CONSERVATION SERVICE Title NAVAJO DISTRICT ANNUAL REPORT 1936-1937, REGION EIGHT Subtitle The two important drainages in the District are the San Juan and the Little Colorado, intermittent streams which with tributaries are responsible for an estimated fifty to sixty percent of the silt carried into the Colorado River and lodged at Boulder Dam. The District boundaries at the present time do no include certain of the up-stream silt- contributing tributaries of both Rivers. Though the enlargement of the District boundaries to include the up-stream tributaries has not yet been made, approval has been secured to carry on specific conservation projects in areas outside the Reservation. Should the District be enlarged, a very desirable change from the standpoint of securing the more complete control of the two watersheds, the land area included within the new boundaries will be about 35,000,000 acres, approximately double the present area. Publisher Department of Agriculture Soil Conservation Service: Window Rock, AZ 1937

		use of waters of the San Juan River Basin in New Mexico in a manner that would inure to the benefit of the Navajo Nation and the State of New Mexico. The Settlement Agreement is intended to provide water rights and associated water development projects, including the Navajo-Gallup Water Supply Project, for the benefit of the Navajo Nation in exchange for a release of claims to water that potentially might otherwise displace existing non-Navajo water uses in the Basin in New Mexico.
